psychologylester a. lefton, linda brannonpearson education, limited, 2004 - 768 pages 0 reviews

with the addition of new co-author linda brannon, lefton now means "active learning" in a brand-new way.

this new edition of *psychology* has undergone a major revision with thousands of new references and dozens of new topics added. new co-author linda brannon has worked closely with lester lefton to rewrite, reorganize, and provide a stronger focus on gender and diversity issues, as well as a new emphasis on the process of research.

four major themes are recurrent in the text: the integration of diversity, the importance of biological/evolutionary topics, the complex relationship between nature and nurture, and the importance of students' ability to apply and critique basic psychological principles within their own lives.

the pedagogical plan reinforces the need for students to *be active* in their own learning process. students are encouraged to review what they have learned, apply what they have learned to the world around them, and reflect on the connections between topics.

this affordable books la carte edition features the exact same content from our traditional textbook in a convenient, notebook-ready loose-leaf format - allowing students to take only what they need to class. as a bonus, the books la carte edition is accompanied by a full-color, laminated study card that's a special tool to help students prepare for exams.
